Operating system: Windows 10 Home in S mode
RAM/Internal storage: 4/64GB
Graphics unit (GPU): Intel® UHD Graphics 600*   Intel® UHD Graphics 605*
Screen size: 13.3" (33.8cm)
Display: Matt Full HD IPS display (1920*1080; 16:9)
Camera: Front: 0.3MP
Interfaces: M.2SSD extension, Mini-HDMI®, 2 $_X$ USB3.1Gen 1, audio out/mic in (3.5mm)
Network: WIFI 802.11 a/ac/b/g/n:2.4 GHz/5 GHz, Bluetooth 4.2, Miracast ™
Card slot: microSD (HC/XC) up to GB, M.2 SSD (42MM- B key)
More: Hall-Sensor, dual-microphone, 2 $_X$ stereo speaker
Size: approx.1240 g
Material/Color: Aluminium, plastic/Silver
Battery: Li-polymer/9charging via DC IN)
Operation and storage
Temperatures:-10℃ to 45℃
Relative humidity: 30% to 70%

Quick guide
Quick guide charging the Surfbook
Please charge your Surfbook fully before using it for the first time.
Connect the DC plug on the supplied power adapter to the charging socket (DC IN) on the Surfbook.
Then plug the power adapter into a socket.

The charging LED lights up while the device is charging.
Only leave the power adapter connected to the socket until the battery of the Surfbook is fully charged. In addition, always disconnect the power adapter from the Surfbook when you are not charging the Surfbook.
Turning on the Surfbook for the first time
Bring the screen upwards until it is standing at a minimum angle of 90° the keyboard.
  Press the on/off switch for about 3 seconds to switch on the Surfbook. The setup assistant will then appear on the screen.
Follow the setup assistant instructions to set up your Surfbook.
During the startup, the wizard prompts you to register for your Microsoft account. If you do not yet have a Microsoft account, please set one up here
  After completion of the startup, your Surfbook is configured this may take several minutes to complete. Do not turn the Surfbook off during this time!

Unlocking the display
As soon as the device has been set up (and every time it is subsequently switched on and booted up), the lock screen appears, Press any key on the keyboard to unlock the screen.
If your Surfbook is password-protected, you must then enter the password.
Alternatively, you can also log into your Surfbook via Windows Hello, to activate and set up this feature, select "Settings"→"Accounts"→"Sign-in options"→"Windows Hello".

Start menu
To display the start menu, click the Windows icon in the bottom left of the display prepress the display or press the Windows button on the keyboard. Press the icon a second time to hide the Start menu.
The Start menu consists of the classic navigation list (A) and a useful app area (B) to the right of the navigation list.
Among other things, the navigation list includes a link to open Settings (cog whell icon).In the app area, you can pin apps and favorites in the form of live tiles and organize them.
In the navigation list (A) you find a list of all installed apps in alphabetical order. An alphabetic quick access to the navigation list appears when you click on a respective first letter.

The Action Center
The Info Center is a bar with quick links to some important Surfbook functions, which you can either display or hide.
To access the Info Center click the menu symbol in the bottom fight-hand corner.
Activating WIFI and opening the browser
   a. Call up Settings (set "Start menu").
   b. In the settings, click "Network & Internet".
   c. Click "WI-FI" on the left in the next screen.

d. Click the slider or the word "Off". The word "On" now appears next to the slider.
e. The Surfbook searches for all available for all available wireless networks nearby and then displays them as a list ("Show available networks").
f. Click the network that you wish to connect to.
g. Enter the network key (password) if necessary.
h. Click "Connect". The Surfbook connects to the selected network.

The button for launching the Internet browser can be found on the task bar at the bottom of the display. Click the little blue "e" to launch the browser. To enter an Internet address (URL), click the search bar displayed centrally at the top of the window.

Reset
If the Surfbook "freezes" and no longer responds, you can reset it. Please and hold down then on/off switches off. Wait for about 20 seconds and then turn the Surfbook on normally.
Any files that have not been saved will be lost when the Surfbook is reset.
Switching off the Surfbook

Standby
Briefly press the on/off switch on the device to activate the standby mode. Press it again quickly to take the Surfbook out of standby mode.

Shutting down
Open the Start menu. Click" Φ " in the bottom area of the Start menu and then tap "Shut down". The Surfbook shuts down.

Saving energy
Deactivate the WIFI function when it is not in use.
Only leave the power adapter connected to the socket until the Surf book's battery id fully charged. In addition, always disconnect the power adapter form the Surfbook when you are not charging the Surfbook.
Reduce the display brightness under "System"→"Display "in the settings.
Activate standby mode or turn off the Surfbook completely if you are not using the Surfbook.

FCC Warning Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
